October 4, 2011

To All Digistar User Group Members:

The Earth and Space Science Laboratory (ESSL) would like to express interest in hosting the 2013 Digistar Users Group conference.

Located in Frederick, Maryland the recently constructed Facility contains a Digistar 3/Chronos Hybrid system supported by 2 HD SP2 projectors. The 35 foot planetarium dome seats 80 and there are two 1200 sq.foot classroom spaces fully equipped with interactive white boards. Additionally we are anticipating a new 15 foot observatory to be built and completed by Spring 2012.

There are a number of hotels and restaurants convenient to the ESSL. This will be an opportunity to also experience all the DC - Metropolitan Baltimore area has to offer as Frederick is located within 50 miles of both cities.

We hope you will consider the Earth and Space Science Laboratory for the 2013 DUG meeting location.

Sincerely,

Mark Bowman – Planetarium Director

Jeffery Grills – Planetarium Director

Dawn Getzandanner- Teacher Specialist for Elementary Science
